

# Site Restoration Haulers and Moderate Risk Waste

Rick Gilbert

MRW Facility Supervisor  
Kitsap County Public Works

---

# History

---

- Kitsap County Board of Health Ordinance 2004-2
- History of problems
- Case-by-case management in Kitsap County
- Formal program needed due to increased volume

# Unique Considerations

- Regular customers
- Bank foreclosures
  - Large volumes
  - Dangerous materials
  - Large quantities
  - Haulers with limited experience

# The good, the bad, and the ugly!

# The Good

**Material packaged in small plastic totes**

**Good ergonomics**

# The Bad

**Material packed in a garbage can**

**Bad ergonomics**

# The Bad

Exposure risk with insecticide aerosol in can

# The Ugly

Unknown residue in the bottom of a garbage can

# Facility Impact

---

- Large loads overwhelm facility resources
- Unknowns decrease worker safety
- Poor packaging increases exposure potential

# Hauler Program Development

- Current Conditions
  - Haulers currently bring in HHW only
  - Health District contact provided for a Solid Waste Handling Permit
  - Schedule appointments with haulers for large loads

# Hauler Program Development

- Future Considerations
  - Explicit packaging and transporting instructions provided in educational brochure
  - Signed acknowledgement of brochure receipt
  - Site address and contact information
  - Require appointments for large loads, large containers, meth house busts
  - Training sessions
